

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Currently amended): A mobile terminal apparatus comprising:

an electronic mail receiving means for receiving unit which receives an electronic mail; and

a pictograph light driving means for unit which, when a pictograph exists in the electronic mail received by the electronic mail receiving ~~means driving unit drives~~, a pictograph light display portion in a color and pattern registered in advance corresponding to the pictograph.

Claim 2 (currently amended): The mobile terminal apparatus according to claim 1, further comprising:

a pictograph light registration means for registering unit which registers a lightening color and pattern in advance corresponding to a pictograph; and

a determination means for determining unit which determines whether or not the pictograph received by the electronic mail receiving ~~means unit~~ is the pictograph registered in advance in the pictograph light registration ~~means unit~~,

wherein, if the pictograph is the registered pictograph, when the electronic mail including the

pictograph is received, the pictograph light display portion is driven by the pictograph light driving ~~means~~ unit in the color and pattern registered in advance corresponding to the pictograph.

Claim 3 (currently amended): The mobile terminal apparatus according to claim 1, further comprising:

a light display setting ~~means for setting unit which sets~~ switching between a state of driving the pictograph light display portion and a state of not driving the pictograph light display portion,

wherein, although the pictograph received by the electronic mail receiving ~~means~~ unit is the pictograph registered in advance in the pictograph light registration ~~means~~ unit, only if the light display setting ~~means~~ unit is set to the state of driving the pictograph light display portion, when the pictograph exists in the pictograph received by the electronic mail receiving ~~means~~ unit, the pictograph light display portion is driven in the color and pattern registered in advance corresponding to the pictograph.

Claim 4 (currently amended): The mobile terminal apparatus according to claim 1, further comprising:

~~an opening/closing determination means for determining~~  
unit which determines whether a cabinet is in a opened  
state or in a closed state; and

~~a pictograph display stopping means unit for which,~~ in  
a state that the opening and closing states of the cover  
are determined by the opening/closing determination ~~means~~  
unit, when a predetermined operation is performed, forcibly  
stopping the display of the pictograph light display  
portion by the pictograph light driving ~~means~~ unit.

Claim 5 (currently amended): The mobile terminal  
apparatus according to claim 4,

wherein, in a case where the cabinet is determined to  
be in the opened state by the opening/closing determination  
~~means~~ unit, when the cover is charged into the closed  
state, when switching of a display screen is operated, or  
when other display competitions occur, the display of the  
pictograph light display portion by the pictograph light  
driving ~~means~~ unit is forcibly stopped, and

wherein, in a case where the cabinet is determined to  
be in the closed state, when a camera key is manipulated,  
when a memo key is manipulated, or when other display  
competitions occur, the display of the pictograph light  
display portion by the pictograph light driving ~~means~~ unit  
is forcibly stopped.

Claim 6 (currently amended): The mobile terminal apparatus according to ~~any one of claims 1 to 5~~ claim 1, wherein the pictograph light display portion is a light emitting diode disposed on the cabinet.

Claim 7 (currently amended): The mobile terminal apparatus according to ~~any one of claims 1 to 5~~ claim 1, wherein the pictograph light display portion is a display portion for displaying the electronic mail.

Claim 8 (currently amended): The mobile terminal apparatus according to ~~any one of claims 1 to 5~~ claim 1, wherein the pictograph light display portion is a sub display portion disposed on the cabinet.

Claim 9 (currently amended): A mobile terminal apparatus comprising:

a displaying means for displaying unit which displays  
an electronic mail list;

an electronic mail selection means for selecting unit  
which selects an arbitrary electronic mail from the  
electronic mail list displayed on the displaying ~~means~~  
unit; and

a pictograph light driving means for unit which, when  
a pictograph registered in advance exists in a main text of  
the electronic mail selected by the electronic mail

~~selection means unit, driving drives~~ a pictograph light display portion in a color and pattern corresponding to the pictograph,

wherein, when the electronic mail including the pictograph registered in advance is selected by the electronic mail ~~selection means unit~~, the pictograph light display portion is driven in the color and pattern the pictograph by the pictograph light driving ~~means unit~~.

Claim 10 (currently amended): A mobile terminal apparatus comprising:

~~a displaying means for displaying unit which displays~~  
an electronic mail list;

~~an electronic mail selection means for selecting unit~~  
~~which selects~~ one electronic mail from the electronic mail list displayed on the displaying ~~means unit~~;

~~a changing means for unit which~~, in a state where a main text of the electronic mail selected by the electronic mail ~~selection means unit~~ is displayed, changing the main text of the displayed electronic mail into a main text of a separate electronic mail;

~~a pictograph light driving means for unit which~~, when the main text of the electronic mail is changed into the main text of the separate electronic mail by the changing ~~means unit~~, if a pictograph registered in advance exists in the separate electronic mail after the changing thereof,

~~driving~~ drives the pictograph light display portion in a color and pattern corresponding to the pictograph.

Claim 11 (currently amended): The mobile terminal apparatus according to claim 10, further comprising:

a pictograph light driving ~~means for unit which~~, in a state where a main text of the electronic mail is displayed, ~~determining~~ determines whether or not a predetermined pictograph exists in the displayed electronic mail and, if the pictograph exists, ~~driving~~ drives the pictograph light display portion in a color and pattern corresponding to the pictograph.

Claim 12 (currently amended): A mobile terminal apparatus comprising:

an editing screen displaying ~~means for displaying unit which displays~~ an editing screen of an electronic mail;

an electronic mail writing ~~means for unit which~~, in a state where the editing screen is displayed by the editing screen displaying ~~means~~ unit, ~~writing~~ writes the electronic mail; and

a pictograph light driving ~~means for unit which~~, when a pictograph registered in advance in a pictograph light registration ~~means~~ unit is used during the wiring of the electronic mail by the electronic mail writing ~~means~~ unit,

~~driving~~ drives the pictograph light display portion in a color and pattern corresponding to the used pictograph.

Claim 13 (currently amended): The mobile terminal apparatus according to claim 12, wherein, every time that the pictograph registered in advance in the pictograph light registration ~~means~~ unit is used during the wiring of the electronic mail, the pictograph light driving ~~means~~ unit drives the pictograph light display portion in the color and pattern corresponding to the used pictograph.

Claim 14 (currently amended): The mobile terminal apparatus according to claim 12 ~~or 13~~, further comprising:

means for, when the editing screen is terminated during the writing of the electronic mail by the electronic mail writing ~~means~~ unit, forcibly stopping the display of the pictograph light display portion by the pictograph light driving ~~means~~ unit.

Claim 15 (currently amended): The mobile terminal apparatus according to claim 12 ~~or 13~~, further comprising:

means for, when a separate event other than the display of the pictograph light display portion by the pictograph light driving ~~means~~ unit occurs during the writing of the electronic mail by the electronic mail writing ~~means~~ unit, displaying the separate event on the

pictograph light display portion with a priority to the driving of the pictograph light display portion by the pictograph light driving ~~means~~ unit.

Claim 16 (currently amended): A mobile terminal apparatus comprising:

~~a previewing means for displaying unit which displays~~  
an electronic mail in order to check a content of the electronic mail in advance,

wherein, when the electronic mail is displayed by the ~~previewing means~~ unit, if a pictograph registered in advance exists in the electronic mail, a pictograph light display portion is driven in a color and pattern corresponding to the pictograph.

Claim 17 (currently amended): The mobile terminal apparatus according to ~~any one of claims 1 to 16~~ claim 1, wherein a plurality of the registered pictographs and the colors and patterns corresponding thereto are arbitrarily set.

Claim 18 (currently amended): The mobile terminal apparatus according to ~~any one of claims 1 to 17~~ claim 1, wherein the pictograph light driving ~~means~~ unit checks the content of the electronic mail and, every time that the pictograph registered in advance exists in the electronic

mail, drives the pictograph light display portion in the color and pattern corresponding to the checked pictographs in a sequential manner thereof.

Claim 19 (new): The mobile terminal apparatus according to claim 9, wherein a plurality of the registered pictographs and the colors and patterns corresponding thereto are arbitrarily set.

Claim 20 (new): The mobile terminal apparatus according to claim 9, wherein the pictograph light driving unit checks the content of the electronic mail and, every time that the pictograph registered in advance exists in the electronic mail, drives the pictograph light display portion in the color and pattern corresponding to the checked pictographs in a sequential manner thereof.

Claim 21 (new): The mobile terminal apparatus according to claim 10, wherein a plurality of the registered pictographs and the colors and patterns corresponding thereto are arbitrarily set.

Claim 22 (new): The mobile terminal apparatus according to claim 10, wherein the pictograph light driving unit checks the content of the electronic mail and, every time that the pictograph registered in advance exists in

the electronic mail, drives the pictograph light display portion in the color and pattern corresponding to the checked pictographs in a sequential manner thereof.

Claim 23 (new): The mobile terminal apparatus according to claim 12, wherein a plurality of the registered pictographs and the colors and patterns corresponding thereto are arbitrarily set.

Claim 24 (new): The mobile terminal apparatus according to claim 12, wherein the pictograph light driving means checks the content of the electronic mail and, every time that the pictograph registered in advance exists in the electronic mail, drives the pictograph light display portion in the color and pattern corresponding to the checked pictographs in a sequential manner thereof.

Claim 25 (new): The mobile terminal apparatus according to claim 16, wherein a plurality of the registered pictographs and the colors and patterns corresponding thereto are arbitrarily set.

Claim 26 (new): The mobile terminal apparatus according to claim 16, wherein the pictograph light driving means checks the content of the electronic mail and, every time that the pictograph registered in advance exists in

the electronic mail, drives the pictograph light display portion in the color and pattern corresponding to the checked pictographs in a sequential manner thereof.
